

# TRIP TO ŠIAULIAI

Wednesday

# Enterprise Toksika

“TOKSIKA“ is a licensed hazardous waste management company. The company's activities are hazardous waste collection, transportation, temporary storage, incineration, disposal of hazardous waste in a landfill, and handling in other ways. There was a person who told us about the company. We were walking around the Toksika territory and the worker was telling us about waste incineration, management and storage. After that we went to the laboratory. There we learnt about how they test the waste, what are the instruments that they use, how they do it and talked about heavy metals and acids in the waste.

# ŠRATC: DAIKTŲ KIEMAS

After “Toksika” we went to the food and waste disposal workshop. There we were told how food waste is separated from plastic packaging. Also we found out that they make biogas from biomass. Later we went to “Daiktų kiemas “ this is a place where people can bring useless items that are too good to throw away and take what they want for free.

# Cross Hill

The Hill of crosses – a place where people not only from Lithuania have put crosses for a couple centuries, witnessed faithfulness and trust of a Christian community to Christ and his Cross.

We were walking around the hill, and saw a lot of different crosses and rosaries.

# It's time for a walk!

Akropolis was the fourth destination that we went to. There we ate lunch, some played bowling or went ice skating.

At the end of our trip we went to Iron fox and golden boy. We walked around the place, had fun and we were amazed by the view.

**PALDIES PAR UZMANĪBU!**

**AČIŪ UŽ DĒMESI!**

**TĀNAN TĀHELEPANU EEST!**
